Cybersecurity and IT Training for a Connected World

No matter how secure you think your organization is, you can always get **Stronger**.

stronger.

Stronger International specializes in Cybersecurity and training for Higher Education, Government and the Energy Sector. We work to make your organization safe, educated and compliant with regulations.

When it comes to protecting your company's precious IT assets from security breaches, ransomware and other forms of virulent cyber crime, there's no such thing as safe enough.

In a world where identity fraud occurs every two seconds, it's not a question of if you will be attacked, only when. Remember, risking your data is risking your business.

Get educated. Get trained. Get **Stronger**.

Stronger International is your ideal consulting and training partner

Stronger International specializes in IT related risk analysis consulting and training across the spectrum of IT, security and skills enhancement training with a specific focus on cybersecurity. Our training faculty includes internationally respected industry experts who can provide valuable insight and training at the department, division or enterprise level.

Stronger
Cyber
Academy

Universities, Colleges and Technical schools have a unique place in our world. They help encourage and train the next generation in technology. Stronger has been working in Higher education since 2006.

We customize Solutions for Higher Education. Call Us.

University IT Departments:

- 1. Onsite technical training
- 2. Onsite certification preparation courses
- 3. Vulnerability assessments
- 4. GDPR compliance migration
- 5. GDPR legal and documentation assistance
- 6. FERPA compliance training
- 7. Cybersecurity faculty and staff online training
- 8. Cybersecurity student online training
- 9. Cybersecurity onsite training and keynote speaking

University Curriculum Development:

- 1. Cyber Range development for War Games for hands-on learning (Rent or Buy)
- 2. Cyber education labs to integrate into any course
- 3. Train the Professor Program – FREE of Charge
- 4. Cyber education – full course outlines and materials to use for basic courses
- 5. Cyber education – full course outlines and materials to use for advanced courses
- 6. Custom Course development

University Continuing Education Departments:

- 1. 125 Modular Technical Continuing Education courses

Cybersecurity and **Compliance** Training

Key Features of Online Training

- **Simple to integrate into a Learning Management System (LMS)**
- **Each user is on a content license for a 12-month or multi-year contract**
- **Hosted Secure LMS – if needed**
- **Easy reporting and management**
- **Full Active Directory Integration can be provided**

300 Different areas of Content Most popular areas include:

- Phishing Training
- Social Engineering Training
- Ransomware Training
- Reporting and Incident Training
- Password Guidelines and Training
- Social Media and Physical Risks
- Mobile devices and Travel
- Connecting Securely to Networks

Trainings available in different languages

We offer the Tools for a complete **Cybersecurity Program**

The number one factor in an organization's security breaches is undereducated employees.

Educating employees is a fraction of the cost of dealing with data breaches.

- Annual Review and training
- Onsite Training
- Written Cybersecurity content
- Short Video Cybersecurity content
- Poster and Screen saver pre-designed materials
- LMS or Active Directory Integration and management

Our Security Awareness Library is a specific tool to educate and give employees the tools to be responsible and take security on as a culture of the organization.

Easy to Run: By Human Resources or the Technical team

Cybersecurity
Course
Offerings

stronger.

Stronger International Cybersecurity courses in:
- Security Awareness
- IS Management Leadership
- Penetration Testing and Ethical Hacking
- Incident Handling
- Forensics
- Disaster Recovery
- Cyber Warfare

Specialization classes in: Healthcare, Auditing, Secure Programming, Cloud Security and Virtualization.

OFFERED ONSITE

SECURE PROGRAMMING
2, 3, or 5-day course
Minimum 8 students – Maximum 30 students
This language-agnostic class is rich in hands-on labs, giving developers a chance to see how attackers think and how framework protects applications or falls short.

CERTIFIED PROFESSIONAL ETHICAL HACKER (CPEH)
5-day course
Minimum 10 students – Maximum 25 students
This class will provide students with a unique perspective on network intrusion investigations and analysis.

MOBILE DEVICE ETHICAL HACKING
5-day course
Minimum 10 students – Maximum 25 students
This class provides an understanding of the fundamental risks of mobility, Wi-Fi, and mobility infrastructure. It engages attendees in solution analysis methodology.

HACKING AND HARDENING WINDOWS
5-day course
Minimum 10 students – Maximum 30 students
The class takes a deep look into Windows security features and how to configure them to minimize the attack surface by providing techniques and countermeasures.

VIRTUALIZATION AND PRIVATE CLOUD SECURITY
5-day course
Minimum 10 students – Maximum 30 students
This course covers risks, demonstrates how to hack some of those risks, and features the best hardening practices known today, including VMware and other technologies to ensure a secure private cloud.

CISSO/CISSP
5-day course
Minimum 10 students – Maximum 25 students
This course is a comprehensive review of information security concepts and industry best practices, and covers the eight domains of the official CISSP CBK.

HANDS-ON CLOUD SECURITY
5-day course
Minimum 10 students – Maximum 25 students
Students will build an application and deploy it to AWS, all while dealing with potential security issues associated with each step. Then they will attack a vulnerable server.

SECURITY OVERVIEW
½ or 1-day course
Minimum 10 students – Maximum 50 students
The security overview course is a lecture format training that includes an overview of best practices in the industry and the vulnerabilities and inherent weaknesses in the systems and platforms used by industry professionals.

Mile2
Course
Offerings

![stronger. logo]

Stronger International received the 2017 North American Mile2 Partner of the year.

Stronger International offers a full offering of Mile2 courses:

- Onsite Training
- Live-remote Training
- Self-Study Online Training

Mile2 is a world leader in Cybersecurity certifications. The training is based on the NIST framework (the US Commerce National Institute of Standards and Technology). The certifications have been approved and placed on the Homeland Security's National Initiative for Cybersecurity Careers and Studies (NICCS) and is the FBI's preferred cyber certification authority.

Training satisfies the NSA and DoD 8570 directive.

NSA AND DOD APPROVED

OFFERED ONSITE

- **C)ISSO** Certified Information Systems Security Officer
- **C)PTE** Certified Penetration Testing Engineer
- **C)PTC** Certified Penetration Testing Consultant
- **C)DRE** Certified Disaster Recovery Engineer
- **C)DFE** Certified Digital Forensics Examiner
- **C)NFE** Certified Network Forensics Examiner
- **C)SWAE** Certified Secure Web Applications Engineer
- **C)IHE** Certified Incident Handling Engineer
- **C)WSE** Certified Wireless Security Engineer
- **C)SS** Certified Security Sentinel
- **C)VA** Certified Vulnerability Assessor
- **C)SLO** Certified Security Leadership Officer
- **C)PEH** Certified Professional Ethical Hacker
- **C)ISSM** Certified Information Systems Security Manager
- **C)ISSA** Certified Information Systems Security Auditor

- **C)ISRM** Certified Information Systems Risk Manager
- **C)SP** Certified Security Principles
- **C)SAP** Certified Security Awareness Principles
- **C)VE** Certified Virtualization Engineer
- **C)VSE** Certified Virtualization Security Engineer
- **C)CSC** Certified Cloud Security Consultant
- **C)VDE** Certified Virtual Desktop Engineer
- **C)ISS** Certified IPv6 Security Specialist
- **C)VFE** Certified Virtualization Forensics Examiner
- **C)PCE** Certified PowerCLI Engineer
- **C)VP** Certified Virtualization Principles
- **C)CSO** Certified Cloud Security Officer

Application
Development

Stronger International offers a full range of popular application development collaboration and project management courses providing vital skills training that helps protect your priceless information assets while enhancing employee value and improving morale.

App

OFFERED ONSITE

SECURE PROGRAMMING
2, 3, or 5-day course
Minimum 8 students – Maximum 30 students
This language-agnostic class is rich in hands-on labs giving developers a chance to see how attackers think and how framework protects applications or falls short.
This course also satisfies section 6.5 of the Payment Card Industry Data Security Standard (PCI DSS)

HTML 5
2-day course
Minimum 12 students – Maximum 30 students
This course gets students up to speed on new HTML5 elements, CSS3 features, and teaches solutions ensuring backward-compatibility with legacy browsers.

OFFERED ONSITE

C# INTERMEDIATE OBJECT ORIENTATION
5-day course
Minimum 10 students – Maximum 30 students
This lab-intensive course provides students an introduction to programming with C#. Students will learn to create applications and libraries.

ADVANCED C# - BUILDING MVC APPLICATIONS
5-day course
Minimum 10 students – Maximum 30 students
This course provides comprehensive information about the capabilities of the .Net Framework, Visual Studio tools, and the C# programming language.

INTRODUCTION TO AGILE USING SCRUM
3-day course
Minimum 10 students – Maximum 30 students
This workshop provides students with a solid foundation in agile philosophy and methods, focusing on the most utilized agile methodology in practice today, Scrum.

PROFESSIONAL SCRUM DEVELOPER TRAINING
3-day course
Minimum 10 students – Maximum 30 students
This intense and unique course helps teams develop and expand their tools to achieve higher productivity, responsiveness, and contentment.

Project Management **Courses**

Stronger International offers a full range of popular application development collaboration and project management courses providing vital skills training that helps protect your priceless information assets while enhancing employee value, and improving morale.

OFFERED ONSITE

SIX SIGMA YELLOW BELT
2-day course
Minimum 10 students – Maximum 30 students
This course teaches foundational knowledge to adopt the approach of advancing the concept and potential of using Six Sigma tools and methodologies within an organization.

SIX SIGMA GREEN BELT
5- or 10-day course
Minimum 8 students – Maximum 16 students
This is a hands-on, experiential model training based on a team project. Skills and abilities are developed as the project is actively developed and worked on.

PROJECT MANAGEMENT PROFESSIONAL
3- or 5-day course
Minimum 10 students – Maximum 30 students
This course covers the entire project lifecycle from initiation and planning through execution, acceptance, support and closure.

PROJECT MANAGEMENT HANDS-ON WORKSHOP
5-day course
Minimum 10 students – Maximum 30 students
This project simulation bootcamp combines lectures, hands-on activities and assignments to demonstrate a full project management cycle from beginning to end.

### VIRTUALIZATION AND PRIVATE CLOUD SECURITY
5-day course
Minimum 10 students – Maximum 30 students
This course covers risks, demonstrates how to hack some of those risks, and features the best hardening practices known today, including VMware and other technologies to ensure a secure private cloud.

VMware
Authorized
Training

vmware®

Stronger International provides authorized training to sit for any VMware certification. The World runs on VMware. Stronger offers live-remote training options for 1-3 people. As the group gets larger onsite instruction becomes more cost effective, and we can facilitate a customized onsite training. Classes range from one day to five days, programs including:

- **VMware** vSphere: Install, Configure, Manage 6.5
- **VMware** vSphere: Fast Track 6.0
- **VMware** vSphere: Install, Configure, Manage 6.0
- **VMware** vSphere: Optimize and Scale 6.5
- **VMware** vSphere: Skills for Operators 6.0
- **VMware** vSphere: Troubleshooting Workshop 6.0
- **VMware** vSphere: What's New 5.5 to 6.5
- **VMware** Horizon: Design and Deploy 6.0
- **VMware** Horizon: Install, Configure, Manage 7.0
- **VMware** Mirage [V5.0] and Horizon with View [V6.0]: Fast Track
- **VMware** NSX: Install, Configure, Manage 6.2
- **VMware** vCenter Site Recovery Manager: Install, Configure, Manage 6.1
- **VMware** vCloud Director: Install, Configure, Manage 8.10
- **VMware** Virtual SAN: Deploy & Manage 6.2
- **VMware** vRealize Automation: Install, Configure, Manage 7.0
- **VMware** vRealize Operations Manager: Install, Configure, Manage 6.2

Government and Military
Courses

Stronger International brings to the table one the most comprehensive lists of course offerings for the defense and intelligence community, providing exact requirements for government and military training.

Our instructors are highly qualified ex-government and military personnel. Stronger holds a GSA Schedule 70 contract with approved training solutions and certifications for the DoD 8140 (updated DoD 8570).

We offer our own proprietary courses, as well as being a Mile2 Accredited Training Center. Through this strategic partnership we offer NSA and FBI authorized Tier 1 training and certifications that can be delivered and proctored on military bases and other federal government facilities requiring top security clearances.

Call us or email info@stronger.tech ask for our capabilities statement. Let us bid on your next training contract.

From
Our Clients

stronger.

"I have been taking the online SQL Database Certification courses with Stronger International, and they have had an immediate benefit in the report writing work that I do. I have been able to improve the quality and breadth of my SQL reports, to the point of pulling off what my employer sees as a "miracle" of data extraction. I would definitely take more classes from these folks!" **Randy MacKay, Hospital Applications Analyst**

"Your pricing is awesome and the way you are working with us is even better. I'm going to start passing your cards around to people so you can work with more CISOs." **Bob Turner, CISO of University of Wisconsin-Madison**

"Thank you so much! You have been really wonderful and so very helpful with walking me through this. Your organization has much to offer. Thanks so much for making sure that we are not short-changed and that we utilize all that you have to offer. " **Patricia Lee, Orange County IT**

"I am blown away at how easy it is to hack poorly built websites, and even more shocked at how easy it is to prevent the majority of these issues. This course was extremely good, first at presenting these vulnerabilities, how the hacker uses the vulnerability, and then how to fix it." **Luke Brosvik, Applications Analyst at City of Spokane**

"We had great success with the training. It was a real eye opener. We actually came out of the class with how to change some of our underlying code to make it more secure. We will be running this training on a regular basis." **Al Regina, Team Lead Applications Developer, York University**

I thought the instructor did an excellent job of keeping the audience engaged and comfortable to interact throughout the presentation. His humble, down to earth approach of the subject made it easy and enjoyable to comprehend. Really enjoyed this training course. **Michael Belczak, General Motors**

"I have attended HIPAA training annually for over 15 years, and this training provided an excellent overview and great interactions. 5 stars." **Gary Sullivan, WeCounsel**

CONSULTING | ONSITE | LIVE-REMOTE | CBT | COMPLIANCE | SECURITY

"**Amazed at the knowledge**"

I am amazed at how knowledgeable the instructor was across all IT fields. It is a true rarity to find someone that can hold their own in a room full of super geeks each in their own field. **Dustin Minnich, Red Hat - Linux Administrator**
